WORK EXPERIENCE

AI Acceleration, ASU

Scottsdale, Arizona

February 2025 - Present

AI Product Manager

- Managed stakeholder communications and roadmap for the Fall 2025 launch of our AI platform at ASU, expanding user access to the product from 10K users to over 180,000 users, ensuring scalable product delivery across diverse academic segments.
- Led the end-to-end development and launch of key AI agent capabilities within Createai Builder, translating complex technical requirements into actionable user stories, which directly improved user satisfaction by 15%.
- Directed a \$0.7M research initiative on AI model for privacy and recommendation capabilities, recruiting and managing 40 evaluators; produced a white paper that helped leadership influence policy decisions.
- Architected clinically-relevant healthcare patient personas and chatbot simulations for first-year medical students, enhancing experiential learning and demonstrating outcomes to an audience of more than 600 at ASU's Empower Day.
- Orchestrated Agile sprints and backlog refinement sessions for AI-driven platforms, fostering transparent communication and ensuring timely feature delivery within an enterprise SaaS context, improving sprint velocity by 20%.

FinEd

Tempe, Arizona

May 2024 - February 2025

Product Manager Intern

- Drove the end-to-end lifecycle of a finance-focused EdTech startup from 0-1, handling a cross-functional team of 18, crafting low-fidelity wireframes, an MVP prototype, a comprehensive roadmap that culminated in a successful \$90K investor raise
- Designed mockups for workflow and onboarding UI designs using Adobe, and integrated REST APIs to enhance data accuracy by 20%
- Managed product development throughout agile development lifecycle methodologies, leveraging version control with Git and GitHub, and CI/CD with GitLab to ensure efficient code management and reduce deployment time by 40%.
- Maintained PRD & refining customer journey mapping by conducting surveys, market analysis, requirement gathering, product specs, collaborating with engineering & design teams and enabled data-driven decision making, ensuring alignment with product strategy

Learning Enterprise

Tempe, Arizona

August 2023 - May 2024

Product Marketing Analyst

- Executed successful go-to-market strategies for new education software features like Personalized Course Recommendations, collaborating closely with engineering & field teams, resulting in a 15% increase in user engagement and signups (~50,000 new users).
- Deployed customization support for content management system for corporate learning programs: led discovery, developer prototype, launched and onboarded 15+ enterprise clients, contributing \$1.2M in recurring revenue
- Drove iterative feature optimization and product success by defining KPIs, conducting A/B testing (e.g., for landing pages leading to a 28% boost in website user engagement), & performing in-depth data analysis to provide actionable insights for product roadmaps.
- Documented technical content workflows using JIRA and coordinated with multiple teams to deliver 75+ branded training assets and e-learning materials, enhancing internal adoption and boosting overall user engagement

Vrisnoft

Ahmedabad, India

April 2020 - July 2022

Analyst

- Managed and authored 10+ comprehensive PRDs and content strategy for key features, integrating customer feedback and usability testing, ensuring clear technical specifications for enterprise products throughout the SDLC, reducing miscommunication by 20%.
- Architected full product delivery of AI-powered booking management system; leveraged ML algorithms to provide data-driven recommendations for booking training sites, decreasing booking errors by 55% across 4800 sites
- Managed requirement analysis for \$0.5M recurring revenue client: identified custom report including data modeling and complex queries request patterns, automated data processing, retrieval, thereby reducing customer request response time by 60%
- Performed comprehensive data analysis and reporting for 15+ critical business units using Microsoft PowerBI, providing actionable insights that directly supported key business decision-making and identified \$2M in potential cost savings.
