Passionate about harnessing the power of data to resolve customer pain points and add value to their lives.

EDUCATION

Arizona State University	Tempe, AZ
Masters of Management Information Systems: Product Management & Strategic Entrepreneurship	CGPA: 3.7
Gujarat Technological University	Gujarat, India
Bachelor of Technology Computer Science: Machine Learning and Analytics	CGPA: 3.6

WORK EXPERIENCE

Product Manager FinEd	May 2024 - Present
→ Driving 0-1 mobile-first experiences and GTM strategies for a financial educational tool, with 20+ team members.	
→ Analyzed customer feedback and product performance metrics using SQL, Python and Excel, leading to a 15% improvement in product features based on user suggestions.	
→ Developed a comprehensive pitch deck outlining the application's investment potential, strategic roadmap, budget requirements, and financial projections for MVP 1, securing stakeholder alignment and preparing for investor presentations.	
→ Implemented strategic A/B testing to validate the feature, resulting in a 20% increase in user sign-ups within 2 months.	
→ Managed cross-functional project teams using Agile methodologies (stand-ups, retrospectives, sprint planning) to deliver high-impact initiatives, resulting in a 15% improvement in project delivery timelines.	
Marketing Analyst Learning Enterprise, ASU	Aug 2023- May 2024
→ Worked with cross functional engineering, design, marketing teams to develop 3 new product strategies for LE marketing, resulting in 15% increased signups for newsletter and course enrollments.	
→ Streamlined end-to-end product delivery processes in Power BI monitoring KPIs , integrating user feedback loops through surveys, usability testing, and in-app analytics, enhancing efficient decision-making for senior leadership.	
→ Facilitated collaboration between business partners and technical teams, leading to the successful launch of 2 major product features "Personalized Course Recommendations" & "Integrated Learning Analytics Tool" with a focus on customer satisfaction and operational efficiency.	
→ Performed quantitative analysis to understand customer behavior and market trends through SQL and Tableau, informing product strategy and leading to a 12% improvement in product adoption rates.	
Product Analyst Intern Sona Data Systems	Jun 2023 - Aug 2023
→ Defined key performance metrics after performing thorough market research and conducted post-launch optimization using Alteryx and Python, reducing churn by 10% through targeted feature improvements.	
→ Developed data-driven strategies after requirement gathering to enhance profitability through pricing optimization and segmentation, achieving an 18% increase in margins for an ecommerce client improving scope, budget and quality .	
→ Documenting product requirements to optimize product features and ensure seamless integration, including APIs & cloud-based solutions analyzing consumer data and feedback, driving a 10% improvement in customer satisfaction scores.	
Associate Product Manager Vrinsofts	Apr 2020- Jun 2022
→ Developed and executed product roadmaps to streamline operational workflows for internal teams, leveraging SQL and Tableau to track and optimize platform performance, reducing process inefficiencies by 20% for SDLC.	
→ Collaborated with engineering, design, & marketing teams to execute product enhancements using data-driven insights ensuring smooth communication & timely execution of initiatives, increasing user engagement by 15% for healthcare apps.	
→ Led the refinement of user testing in collaboration with stakeholders, performing frameworks like MoSCoW and RICE to evaluate the impact & feasibility of backlog items, leading to the identification & removal of low-value tasks.	
→ Designed & implemented data-driven decision-making frameworks using NumPy, Scikit learn, Pandas and SQL to analyze customer behavior, forecast trends, and optimize product features boosting customer satisfaction scores by 15%.	
→ Mapped complex systems and workflows to identify pain points and recommended solutions, streamlining team collaboration and increasing operational efficiency by 15%.	

PROJECTS

Finance Education App Development Python, SQL, Product Roadmapping, ML, JIRA, AWS
- Defined the product roadmap, collaborated with designers and developers, and successfully launched MVP features, including "learning module", "news summary" and "community page".

TECHNICAL SKILLS

Technical Skills: Python, SQL, Git, Excel, HubSpot, Power BI, Looker, Tableau, AWS, Snowflake, Data Warehouse, AI/ML models, Asana, JIRA, Notion, Confluence, Trello, Aha, ZenDesk, SurveyMonkey, Figma, OKRs, KPIs, Agile Methodologies.
